BESPOKE GARDEN BUILDINGS

Welcome to Stonehouse Bespoke Garden Buildings, where your dreams of expanding your living space become a reality.

Have you ever envisioned a tranquil outdoor garden room, a productive office nestled in nature, or a personal gym in the comfort of your back garden? Look no further, as we specialize in crafting fully bespoke designs tailored to your unique vision. Our commitment to excellence is reflected in the use of premium-grade materials and an installation process that is customized to your preferences.

Your new garden room is closer than you think, waiting to enhance your lifestyle and provide a harmonious connection between indoor comfort and the beauty of the outdoors.

Each page of this brochure unfolds a story of innovation, dedication, and craftsmanship, highlighting the unique designs that have transformed outdoor spaces into bespoke havens.

## About us...

Formed in 2020, Stonehouse Garden Buildings is a distinguished entity renowned for its expertise in house building, home design, interior design, and furniture making. With a rich history in these domains, Stonehouse Garden Buildings has cultivated a reputation for delivering exceptional craftsmanship and personalized solutions. Their team of skilled professionals brings a wealth of experience to every project, ensuring that each endeavor is characterized by innovation, quality, and meticulous attention to detail.

What sets Stonehouse Garden Buildings apart is their commitment to providing a truly bespoke service that caters to the unique preferences and needs of each client. Recognising that every individual has distinct tastes and requirements, the company takes pride in tailoring their creations to reflect the client's vision and lifestyle. The hallmark of their approach is a comprehensive understanding of architectural aesthetics, interior dynamics, and the art of furniture making.

Based in the picturesque county of Gloucestershire, Stonehouse Garden Buildings stands out not only for its craftsmanship but also for its customer-centric approach. The team at Stonehouse Garden Buildings is known for its friendly and approachable demeanor, fostering a collaborative environment where clients feel comfortable expressing their ideas.

Moreover, recognizing the demands of modern life, Stonehouse Garden Buildings offers a unique service where they bring their expertise to you. There's no need for clients to visit their premises; instead, the team at Stonehouse Garden Buildings travels to clients, showcasing a range of options and finishes in the comfort of their homes. This personalized and convenient service reflects their dedication to ensuring a seamless and enjoyable experience for every client.

BESPOKE GARDEN BUILDINGS

# Reasons why we are different...

Our structures are not just built to last; they are supplier-backed, ensuring you have the confidence and assurance of a reliable investment. With a remarkable 60-year lifespan, our garden buildings are designed to withstand the test of time and the elements.

We offer a comprehensive 10-year warranty on all our installations. This warranty serves as a pledge to our clients, ensuring peace of mind and confidence in the longevity and durability of their bespoke structures.

To separate us from the others, we pride ourselves on our 7 unique design and constructions features. These features reassure our clients that there are receiving the very latest in design and construction techniques.

## THE FLOOR

### FROM TOP DOWN;

- 8mm laminate flooring
- 2mm underlay
- 18mm OSB (Oriented Strand Board)
- 50mm Rockwool Insulation
- 50mm Celotex
- 4x2 Frame Work
- Stainless Steel Support Cables

## STANDARD WALL

### FROM LEFT TO RIGHT;

- 12.5mm Plasterboard Vapour Proof + Skimmed
- 4x2 Framework
- 100mm Rockwool Insulation
- 9mm OSB (Oriented Strand Board)
- Building Paper
- 25mm x50mm battens
- Exterior Cladding

## FIRELINE WALL

### FROM LEFT TO RIGHT;

- 12.5mm Fireline Plasterboard
- Vapour Proof + Skimmed
- 4x2 Framework
- 100mm Rockwool Insulation
- 9mm MAG Ply
- Building Paper
- 25mm x50mm battens
- Juniper Green Fireline Cladding

## THE ROOF

### FROM TOP DOWN;

- 1.5mm EPDM Rubber Membrane
- 18mm OSB (Orientated Strand Board)
- 100mm Rockwool Insulation
- 6x2 Roof Joists
- 12.5m Plasterboard Vapour Proof
- Plaster Skim
- Allowing for installation of Downlights.

## STRUCTURAL FLITCH

An 8mm x 150mm steel section sandwiched between 2 x 150mm x 50mm structural timbers. The design allows us to incorporate up to 4.5m bi-folds/openings unsupported with a calculated deflection allowing several people to walk all over the roof as and when required.

## SUPPORT MATRIX

95% of our installations are installed using a combination of our Enviro-pad and Enviro-Post matrix construction process.

## THE FOUNDATIONS

### ENVIROPAD

Compressed Concrete Pad  
450mm x 450mm  
HDPE Membrane

### ENVIROPILE

Wooden Post  
Concrete Pile  
HDPE Membrane

### STEEL PILE

Attached to timber supports  
75mm x 75mm x 5mm  
Concrete Pile  
HDPE Membrane

## Passionate about what we do

At Stonehouse Garden Buildings, the commitment to providing an unparalleled client experience is evident in their approach to design. The company takes pride in offering an in-depth, clear, and detailed design process that places clients firmly in the driving seat of their creative vision. Recognising that no two jobs are alike, Stonehouse Garden Buildings tailors each design to the unique specifications and preferences of the client, ensuring that the result is a true reflection of individual style and functionality.

A hallmark of their commitment to excellence is the meticulous selection of materials. Stonehouse Garden Buildings places a premium on using only the very best materials, ensuring durability, longevity, and a superior finish for every project. The company's craftsmen bring a great eye for detail to every aspect of the design and construction process, ensuring that even the smallest elements contribute to the overall aesthetic and functionality of the final product.

In embracing this philosophy, Stonehouse Garden Buildings not only delivers exceptional garden buildings but also creates enduring spaces that harmonize seamlessly with their natural surroundings. This unwavering dedication to craftsmanship, attention to detail, and the use of premium materials underscores Stonehouse Garden Buildings' commitment to providing clients with not just structures, but timeless and personalized additions to their living spaces.

Kitchen and bathroom design & installation services

Fully plastered interior finish

## PROJECT 1 – Mr & Mrs Singh

**Multi-functional Space:** Integrating an office and gym within the garden studio makes it a versatile space that can serve multiple purposes. This is especially valuable for those who want a dedicated area for work and fitness without sacrificing the convenience of being at home.

**Large Canopy and Seating Area:** The addition of a stepped canopy not only provides a unique and visually interesting design feature but also serves a practical purpose by creating an outdoor seating area. This adds an extra dimension to the space, allowing users to enjoy the garden while protected from the elements.

**Dimensions:** With a main building area of 29.5 square meters, we've allocated enough space for the office and gym. The 12-square-meter canopy further extends the usable area and enhances the overall design.

**Cladding:** The use of charcoal composite cladding with a vertical orientation is a contemporary choice. Composite cladding is often selected for its durability, low maintenance requirements, and aesthetic appeal.

**Fenestration:** Incorporating bi-folding and sliding doors indicates a focus on maximizing natural light, ventilation, and creating a seamless connection between the indoor and outdoor spaces. This can contribute to a bright and inviting atmosphere within the studio.

**Interior Finishes:** A fully plastered interior adds a polished and refined touch to the space. Combined with the electrics pack, which includes lighting and power outlets, it ensures that the studio is ready for immediate use.

## PROJECT 2 – Mr & Mrs Hussain

**Multi-functional Entertaining Space:** The incorporation of a TV, sofa bed, and a bathroom in the main building allows for a great use of space. This is particularly convenient for hosting guests, providing them with a comfortable and private area to stay.

**Large Canopy for Outdoor Entertainment:** The inclusion of a large canopy expands the usable space, creating an outdoor area for sheltered relaxation and movie nights. This adds an extra dimension to the entertaining space, allowing guests to enjoy the outdoors comfortably.

**Thermowood Cladding:** The use of thermowood cladding offers a natural and warm aesthetic to the main building. Thermowood is known for its durability and resistance to decay, making it a suitable choice for exterior applications.

**Charcoal Composite Decking:** The charcoal composite decking complements the cladding, adding a modern and sleek touch to the outdoor area. Composite decking is favored for its low maintenance and resistance to the elements.

**Elegant Anthracite Bi-fold Doors:** The installation of elegant, anthracite bi-fold doors not only enhances the aesthetics but also provides a seamless transition between the indoor and outdoor spaces. This allows for flexibility in how the space is used and maximizes natural light.

**Fitted Electrics and Lighting Packs:** Including fitted electrics and lighting packs ensures that the space is functional and well-lit. This is especially important for creating a comfortable and inviting atmosphere during evening entertainment or when guests are staying over.

## PROJECT 3 – Mr & Mrs Smith

**Swim Spa Integration:** The inclusion of a 7m x 2.5m swim spa under the canopy is a unique and luxurious feature. This provides the client with a space for exercise and relaxation, combining the benefits of a swimming pool with the convenience of a spa.

**Multi-functional Spaces:** Incorporating a sauna, gym, bathroom, and entertaining space within the building showcases a thoughtful approach to providing a variety of amenities. This makes the entire structure a versatile and well-utilized space that caters to different needs.

**Ample Canopy Area:** With a 40-square-meter canopy, you've created a generous covered area that not only shelters the swim spa but also extends the usable space for outdoor activities. This allows for year-round use, regardless of the weather.

**Cladding Variety:** The combination of thermowood grain and charcoal cladding adds visual interest and texture to the exterior. This mixture can create a modern yet natural aesthetic, contributing to the overall design harmony.

**Decking and Balustrade:** The addition of decking enhances the outdoor experience, providing a functional and aesthetically pleasing surface. The stainless-steel balustrade adds a contemporary touch while ensuring safety and durability.

**Full Electric Pack:** Including lighting, plumbing, and sockets in the electric pack ensures that the space is fully equipped for various activities. Adequate lighting is crucial for both safety and ambiance, while the inclusion of plumbing and sockets adds convenience for the sauna, gym, and entertainment areas.

## PROJECT 4 – Mr & Mrs Burgess

**Dual Purpose Space:** The incorporation of a combined office space and health and wellness room reflects a modern and holistic approach to home design. This allows the clients to efficiently manage both work and personal well-being within the same structure.

**Toilet and Basin:** Including a fully functioning toilet and basin adds a practical element to the structure, enhancing its usability and convenience. This is especially beneficial for a home office setup where occupants may spend extended periods working.

**Material Choices:** The use of teak strip wood composite for the main building and charcoal composite for the decking adds a touch of sophistication and durability to the structure. Composite materials are known for their low maintenance requirements, making them practical choices for outdoor structures.

**Fenestration:** Anthracite sliding doors and square windows contribute to the contemporary aesthetic of the space. The sliding doors likely provide a seamless connection between the indoor and outdoor areas, while the square windows bring in natural light and contribute to the overall design symmetry.

**Fully Plastered Finish:** A fully plastered finish inside the building creates a polished and professional look. This ensures that the space is ready for painting, décor, skirting etc..

**Water and Electric Hookup:** Having water and electric hookups adds to the versatility of the space. This allows for the inclusion of appliances, lighting, and other amenities that contribute to the functionality and comfort of both the office and wellness area.

## PROJECT 5 – Mr & Mrs Ponsford

**Homely Entertainment Space:** The inclusion of a fireplace, large TV, and integrated bar area creates a warm and inviting atmosphere, making it a perfect setting for socializing and relaxation.

**Generous Canopy:** The 20sqm canopy adds an outdoor element to the entertainment space, providing an extension to the interior and creating an opportunity for outdoor activities or simply enjoying the fresh air.

**Cladding and Decking:** The use of slatted, charcoal composite cladding gives the exterior a modern and stylish appearance. Matching the decking with the cladding creates a cohesive look, contributing to the overall aesthetic of the space. The composite material likely offers durability and low maintenance, which is advantageous for outdoor structures.

**Large Sliding Doors:** The installation of large sliding doors not only allows ample natural light to enter the space but also enhances the connection between the indoor and outdoor areas. This creates a seamless transition and contributes to an open and airy feel.

**Lighting:** External lights, along with downlights, play a crucial role in setting the ambiance of the space. External lights can create a welcoming atmosphere outside, while downlights inside can provide focused and comfortable lighting for various activities.

**Fully Plastered Finish:** A fully plastered finish adds a polished and refined touch to the interior, contributing to the overall homely and upscale feel of the entertainment space.

## PROJECT 6 – Mr & Mrs Levene

**Maximized Space with Fire Walls:** Using fire walls to maximize the garden space is a strategic approach, allowing you to make the most of the available area for the gym. This is especially important in urban settings like London where space is often limited.

**Soundproofing:** Incorporating acoustic wool and felt, along with a slatted rear wall, demonstrates a commitment to creating a private and noise-isolated environment for the gym. This is crucial for maintaining a peaceful atmosphere and avoiding disturbances to neighbours.

**Full Height and Width Mirror:** Installing a full-height and width mirror is a thoughtful addition to the gym. Mirrors not only serve practical purposes for checking form during workouts but also contribute to creating a visually open and spacious feel within the confined space.

**Wall-Mounted TV:** Including a wall-mounted TV provides entertainment options for users during workouts, making the gym experience more enjoyable and motivating.

**External Cladding:** The use of Western Red Cedar for external cladding not only adds natural beauty to the structure but also brings durability and resistance to decay. It's a popular choice for its aesthetic appeal and low maintenance requirements.

**Fenestration:** The installation of the full-width bi-fold doors is an excellent choice to open the space and create a seamless connection between the interior and the garden. This not only enhances natural light and ventilation but also provides a visually appealing transition between indoor and outdoor areas.

## PROJECT 7 – Mr & Mrs Wilson

**General Purpose Utility Space:** The design of a general-purpose utility space suggests versatility and adaptability for various uses. This type of space can serve as a workshop, storage area, or any other utility function based on the client's needs.

**Thermowood Cladding:** The use of thermowood cladding adds a natural and warm aesthetic to the exterior. Thermowood is known for its durability, stability, and resistance to decay, making it a suitable choice for outdoor applications.

**Charcoal Composite Deck Boards:** The selection of charcoal composite deck boards not only provides a contemporary look but also offers durability and low maintenance. Composite decking is often chosen for its resistance to weathering and insects.

**Raised Deck with Anthracite Balustrades:** Building the raised deck into the sloped garden adds visual interest and makes the most of the available space. The use of anthracite balustrades complements the deck boards, providing a cohesive and modern appearance while ensuring safety.

**Bi-fold Doors:** Installing matching bi-fold doors further enhances the connection between the indoor and outdoor spaces. This allows for flexibility in how the utility space is used and provides easy access to the raised deck area.

**Internal and External Electrics and Lighting:** Including both internal and external electrics and lighting adds functionality and convenience to the space. This ensures that the utility area is well-lit for practical purposes and that the outdoor space can be enjoyed during the evening.

## PROJECT 8 – Mr & Mrs Stevens

**Multi-functional Design:** The incorporation of a main room and a canopy area with different purposes allows for a variety of activities, making the space adaptable to the needs of the occupants. The main room's inclusion of a TV and pool table suggests a space for entertainment and relaxation, while the canopy area provides an outdoor gathering space with seating and a BBQ.

**Western Red Cedar Cladding:** The use of Western Red Cedar cladding adds a natural and aesthetically pleasing element to the exterior. Cedar is known for its durability, resistance to decay, and distinctive color, making it a popular choice for outdoor structures.

**Charcoal Composite Decking:** The choice of charcoal composite decking complements the cedar cladding, providing a modern and low-maintenance flooring option. Composite decking is durable, resistant to weathering, and often requires less maintenance than traditional wood decking.

**TV and Pool Table:** Including a TV and pool table in the main room creates an entertainment-focused atmosphere. This allows the space to serve as a recreational area for both indoor and outdoor activities.

**Downlights:** The use of downlights adds a stylish and practical lighting solution to the space. Downlights can create a warm and inviting atmosphere while also ensuring sufficient illumination for various activities.

**Canopy Area:** Designating the canopy area for entertainment with seating and a BBQ expands the usable space and provides an outdoor setting for socializing and enjoying meals in the evening sun.

# Features & Benefits...

## SALES SURVEYS

Our surveys are designed to make the process more convenient for potential customers by eliminating the need for them to travel to the physical location of Stonehouse Garden Buildings. Instead, the company emphasizes a personalised service where they proactively bring advice, samples, and knowledge directly to the customer's location. This approach aims to enhance the customer experience and make the decision-making process more accessible and tailored to individual needs.

## ALL YEAR ROUND

This commitment to year-round service indicates flexibility and availability for customers. This approach is advantageous for customers who may have specific timelines or preferences for when they want their garden buildings to be manufactured and installed. It reflects a dedication to meeting customer needs on an ongoing basis, contributing to a more accessible and customer-friendly experience.

## BUILT BY US

Stonehouse Garden Buildings take great pride in handling the entire manufacturing process internally. This can offer greater control over the production process, allowing for consistent quality and attention to detail. Our experienced craftsmen have the expertise needed to create our high-quality components.

## BESPOKE DESIGN

We take pride in offering a bespoke design service that caters to the unique preferences and requirements of each customer. We provide clear and detailed plans that empower clients to visualise their dream garden space. This emphasis on transparency not only ensures a comprehensive understanding of the proposed design but also makes it easy for customers to adjust if needed..

# STONEHOUSE

BESPOKE GARDEN BUILDINGS

## FULL BUILD SURVEY

Prior to the actual installation, the company takes the initiative to conduct on-site visits, ensuring that all measurements are accurate and addressing any potential challenges. This proactive approach includes a thorough check for underground utilities, helping to avoid any complications during the installation phase.

## KITCHEN & BATHROOM DESIGN

We offer the design and integration of bathroom and kitchen facilities. This provides a versatile approach to garden room design, catering to customers who may want more than just a standard structure. We believe in offering more than just an empty room.

## FULLY PLASTERED

Stonehouse Garden Buildings takes the hassle out of the finishing touches by ensuring a fully plastered finish for their garden buildings. This commitment means that customers are provided with a smooth and professionally plastered interior, eliminating the need for additional finishing work.

## FULLY CONNECTED

We provide a comprehensive service that goes beyond installation. During the installation, the company ensures a seamless connection of essential utilities such as water and electricity. This proactive approach ensures that customers are not only getting a beautifully constructed garden building but also a fully functional and ready-to-use space.

# What our clients say...

"I have just built a garden studio and have to say I am so happy with the final product.

Rob, Sam and Grant were all so professional and helpful along the way.

Listen to their advice!"

- Daniel Levene on Google ★★★★★

"We are delighted with our new garden office/storage space!

The Stonehouse Garden Buildings team were helpful and responsive throughout the whole process.

We would highly recommend them to anyone."

- Eleanor Britten on Google ★★★★★

"Fabulous company to deal with. The product is top quality and the team working on it were an absolute delight with expertise and attention to detail.

Tom, Conor and Sam are a credit to the company!

We are more than delighted with the quality of the end product and having researched many companies KNOW we absolutely made the right choice."

- Julie Nottage on Google ★★★★★

**STONEHOUSE**

BESPOKE GARDEN BUILDINGS

**STONEHOUSE**

BESPOKE GARDEN BUILDINGS

"I would thoroughly recommend this company.

Excellent communication, and an accurate timetable helped with our planning.

The people who worked on our garden building were exceptional, especially Ryan, with every part showing top quality work and high standard materials used.

We love the finished article and it's made a real difference to our family with the extra space."

- **Rich Gordon** on Google ★★★★★

**STONEHOUSE**

BESPOKE GARDEN BUILDINGS

"What an excellent service from start to finish. There were a few points where teams suggested slight changes - there were no extra costs and based on new developments in the profession - all were excellent and added value to the build.

I cannot recommend the team highly enough. Its a lot of money we know, but you really get what you ask for and more - a trouble free experience. Thanks to Mike, Rob and the entire team for making this an actually enjoyable experience!"

- **David J Smith** on Google ★★★★★

**STONEHOUSE**

BESPOKE GARDEN BUILDINGS

"In September 2022 we visited a large Garden office manufacturer some distance away with a view to installing a garden office at our rural home on the Welsh border. We had quite a specific design in mind but felt that with the larger company they lacked flexibility resulting in several compromises.

With the above in mind, we contacted Tracie at "Stonehouse Garden Buildings" and a couple of their design staff visited us the following day and were able to offer us exactly what we had originally wanted with some additional ideas, all at a very competitive price.

In conclusion, we have found the entire process from our first phone call in April to the completed building has been a very smooth and professionally executed experience. Tracie has always been very approachable by phone or email answering all our queries promptly.

She provided us with an accurate itinerary and timescale for our project from the outset.

We would wholeheartedly recommend Stonehouse Garden Buildings to all who are looking to provide that additional space in their homes. Good choice."

- **Tim Aketser** on Google ★★★★★
